Dear Daron:

Enclosed are 3 copies of replacement pages and figures for the Savage Coal Terminal Permit. Savage Industries is proposing to restart a portion of the preparation plant to make a specialty coal product. The restart of the plant will not involve coal washing, nor will it generate any refuse. The operation will utilize existing coal stockpile areas, as well as existing crushing, screening and conveyor systems.

The information herein submitted is intended to describe the proposed operation as well as to update portions of the MRP that are no longer applicable (coal washing, refuse, thickener, etc.).

Since this proposal utilizes existing approved facilities, no bonding adjustments should be necessary. Also, all facilities are covered by the existing Air Quality Approval Order.

Red-line/strikeout copies have been provided, along with the C<sub>1</sub>/C<sub>2</sub> Forms. If you have any questions, or need additional information, please let me know.

Sincerely,

A handwritten signature in black ink, appearing to read "Dan W. Guy". The signature is fluid and cursive, with a large initial "D" and a stylized "G".
